OUR MISSION

Our mission is simple: to provide the best products and service to our customers at the lowest prices possible. We take great pride in our company, our commitment to customer service and in the products we sell. Our online store is designed to provide you with a safe and secure environment to browse our product catalog. We are a New York based full service concrete cutting, core drilling, slab sawing, wall sawing, wire sawing, and GPR scanning company. As a professional cutting company, we also sell and service a complete line of diamond cutting products, safety equipment, and power tools. If you do not see what you are looking for, give us a call or drop us an Email and we will be glad to assist you.

NYCON Concrete Cutting
A NYCON Diamond Company Bohemia NY.
We Service Nassau, Suffolk, NYC, Connecticut and NJ

NYCON Diamond & Tool Inc.

With 25 years of experience in the cutting concrete field, NYCON Diamond & Tool Inc. has field proven the best tools, equipment and products. **Let us bring that experience to your next project!** We carry a full line of custom formulated abrasives and diamond products to rapidly and effectively make your concrete cutting faster and less costly.

We carry all the equipment you need to get the job done right!

Although NYCON specializes in Concrete Cutting Equipment Bits, Blades and Products, we also have a vast offering of Fire stopping, Tools, Hardware, Anchors and Vacuums. We have the right products you need at the best cost. Let us keep you on target and reduce your cost today!

CORE DRILL MOTORS

QDM-350 is a powerful 3 speed rig-mounted diamond core drill motor, to be used with cores up to 350mm.

QDM-350 Series Rig Mounted

The QDM-350 Series Motors are a powerful, rig mounted (not included) Core Drill motor. To be used with bits up to 14" in Diameter. 3-Speed Gearbox and a 2.8Kw motor ensuring strength and easy functionality for the user. 20A & 30A variants available below. Built-in anti-seize ring. All metal construction allows for improved cooling & increased durability. 2 Built in levels. Oil bath 3-speed gearbox. Carry handle for ease of use.

- 1 Year Warranty on all QDM Models
- Warranty begins on date of purchase
- Machine Services/ Non-Warranty Parts are NOT included in the free warranty
- Warranty excludes wear & tear parts (Clutches, Seals and Bearings)
- Warranty does not cover repairs made due to gross negligence, accidental damage or vandalism.

QDM-350 Specification

3 Speed Oil Bath Gearbox

UNC Male and BSP Female Connection with Integrated Anti-Jam Ring

3 Speed Oil Bath Gearbox

QDM-150 Series Handheld

The QDM-150 Series Motors are packed with 10% more input to output ratio than other professional Core Drill Motors. Innovative (IPM) Intelligent Power Management System manages the volume of power going into the motor. This avoids overloading, increasing the longevity of the machine. Ergonomic Handle & Extra front support handle gives you more control over the machine & ensures accurate and reliable drilling. All metal construction allows for improved cooling & increased durability of the machine as overheating is kept to a minimum.

- 1 Year Warranty on all QDM Models
- Warranty begins on date of purchase
- Machine Services/ Non-Warranty Parts are NOT Included in the free warranty
- Warranty excludes wear & tear parts (Clutches, Seals and Bearings)
- Warranty does not cover repairs made due to gross negligence, Accidental damage or vandalism.

K50 TURBO CORE DRILL BITS

K50 Core Drill

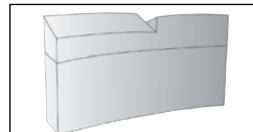

The K50 is a universal specification that can be used across a wide variety of aggregates and natural stone. The positioned diamond segment composition along with the twisted rooftop design ensures fast cutting in concrete with heavy steel content, particularly on low to mid power motors

TECHNICAL SPECIFICATION

Segment Length.....24mm
Segment Heigh.....10mm + 2mm
Segment Depth.....3.5mm
Segment Typ.....Twisted Rooftop

Diamond follows the direction of the cut

Twisted rooftop

K50 Turbo Core Drill Bits Specification

- Twisted rooftop design segment makes starting the cut faster and easier
- Ideal for hand held motors
- Fast cutting in reinforced concrete and hard materials

K50 TURBO CORE DRILL			
ITEM #	#	SPECS	PRICE

Z1 TURBO CORE DRILL BITS

Z1 Core Drill

The Z1 is a very universal drilling segment. With exceptional results in reinforced concrete, it is known for its outstanding speed, without compromising on life. With its turbo slots and rooftop design segment, you can always rely on the Z1 coredrill to deliver on speed, particularly when used on low to medium power motors.

TECHNICAL SPECIFICATION

Segment Length.....24mm
Segment Heigh.....9.5mm
Segment Depth.....3.5mm
Segment Typ.....Rooftop

Turbo Slots

Twisted
Rooftop Design

Z1 Turbo Core Drill Bits Specification

- Rooftop design makes starting the cut faster and easier
- Turbo Slots in the segment improves slurry removal
- Fast drilling in reinforced concrete Ideal for low to medium power motors

CORE & GRANITE DRILL BITS

For Drilling Concrete, Field Stone, and Marble Coring Granite,

Pre-Cast Plank Bits

The positioned diamond segment composition along with the twisted rooftop design ensures fast cutting in Plank concrete (Hollow Core Slab, Voided Slab, Hollow Core Plank or Concrete Plank) with reinforcing steel wire rope. Bit is designed to work particularly on low to mid power motors.

Hole Saw Kits

Includes High Density Polyethylene Case

#SHH51 Handyman's Kit

Contains FIVE popular holesaws for a variety of installation and maintenance applications. Includes 7/8", 1", 1-1/8", 1-1/4", & 1-1/2" holesaws, and SHM5514 Mandrel, and SHA5511 Mandrel adapter.

#SHL62 Locksmith's Kit

Contains SIX holesaws for installation of popular locks and deadbolts. Includes 7/8", 1", 1-1/8", 1-1/4", 1-1/2", & 2-1/8" holesaws, SHM5514 & SHM5545 Mandrel, plus a SHA5511 Mandrel adapter.

#SHE62 Electrician's Kit

Contains SIX holesaws most often needed for pipe and conduit entrance. Includes 7/8", 1-1/8", 1-3/8", 1-3/4", 2", & 2-1/2" holesaws, SHM5514 & SHM5545 Mandrel, plus a SHA5511 Mandrel adapter.

#SHP62 Plumber's Kit

Contains SIX holesaws often used for pipe and tap entrance. Includes 3/4", 7/8", 1-1/8", 1-1/2", 1-3/4", & 2-1/4" holesaws, SHM5514 & SHM5545 Mandrel, plus a SHA5511 Mandrel adapter.

#SHJ92 Journeyman's Kit

A deluxe Plumber's Kit containing NINE holesaws covering tap sizes 1/2" to 2", and pipe entrances from 3/8" to 2". Includes 3/4", 7/8", 1-1/8", 1-1/2", 1-3/4", 2", 2-1/4", & 2-1/2" holesaws, SHM5514 & SHM5545 Mandrel, plus a SHA5511 Mandrel adapter.

HOLE SAWS ACCESSORIES

USED FOR A VARIETY OF APPLICATIONS IN METAL CUTTING, PLUMBING, ELECTRICAL, CONSTRUCTIONS, MAINTENANCE AND AUTOMOTIVE TRADES.

NY.NFC38065	25	Acorn Nut Sleeve Anchor - 1/2" x 2-1/4" - Effective Length 2-1/4"; Bolt Diam 3/8" - Hole Size needed 1/2"	\$28.88
NY.NFC38080	25	Acorn Nut Sleeve Anchor - 1/2" x 3" - Effective Length 3"; Bolt Diam 3/8" - Hole Size needed 1/2"	\$20.37
NY.NFC38115	25	Acorn Nut Sleeve Anchor - 1/2" x 4" - Effective Length 4"; Bolt Diam 3/8" - Hole Size needed 1/2"	\$24.71
NY.NFC38150	25	Acorn Nut Sleeve Anchor - 1/2" x 6" - Effective Length 6"; Bolt Diam 3/8" - Hole Size needed 1/2"	\$33.71
NY.NFC12075	25	Acorn Nut Sleeve Anchor - 5/8" x 2-1/4" - Effective Length 2-1/4"; Bolt Diam 1/2" - Hole Size needed 5/8"	\$28.88
NY.NFC12090	25	Acorn Nut Sleeve Anchor - 5/8" x 3" - Effective Length 3"; Bolt Diam 1/2" - Hole Size needed 5/8"	\$37.21
NY.NFC12110	10	Acorn Nut Sleeve Anchor - 5/8" x 4-1/4" - Effective Length 4-1/4"; Bolt Diam 1/2" - Hole Size needed 5/8"	\$18.20
NY.NFC12150	10	Acorn Nut Sleeve Anchor - 5/8" x 6" - Effective Length 6"; Bolt Diam 1/2" - Hole Size needed 5/8"	\$20.48
NY.NFC58080	10	Acorn Nut Sleeve Anchor - 3/4" x 2-1/2" - Effective Length 2-1/2"; Bolt Diam 5/8" - Hole Size needed 3/4"	\$18.90
NY.NFC58115	10	Acorn Nut Sleeve Anchor - 3/4" x 4-1/4" - Effective Length 4-1/4"; Bolt Diam 5/8" - Hole Size needed 3/4"	\$26.25
NY.NFC58120	10	Acorn Nut Sleeve Anchor - 3/4" x 6-1/4" - Effective Length 6-1/4"; Bolt Diam 5/8" - Hole Size needed 3/4"	\$35.70

*Also Available In Stainless Steel - Call for more information.

ANCHOR DIAMETER EQUALS HOLE DIAMETER; COMPLETE SETS WITH WASHER AND NUT.
COLLAR DESIGN EXPANDS ON FIRST TURN OF THE NUT. READY TO USE.

STUD WEDGE ANCHORS

NY.NFC5561	10	1/2" X 6" Round Head Wing & Screw	\$248.50

BLADE TROUBLESHOOTING

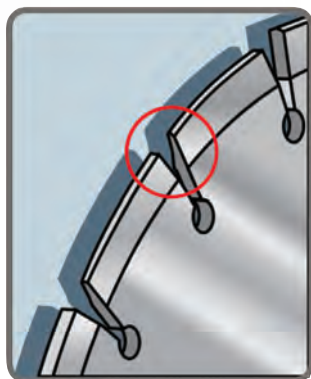

WARNING!
Inspect Blades
Frequently.

SLOW CUTTING SPEED

CAUSE – Material being cut is too hard for the blade. The hard material wears the exposed diamonds but not the metal portion of the segment. The segment wears too slowly, no new diamonds are exposed.

SOLUTION – Cut a soft abrasive material until diamonds are well exposed. Try asphalt block, sandstone, or dried mortar. Choose proper blade for the application.

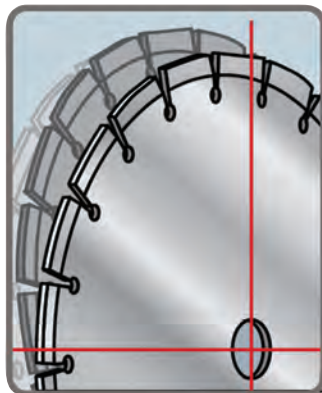

UNEVEN SEGMENT WEAR

CAUSE – Insufficient water flow on one side of blade.

SOLUTION – Flush water system and check for adequate and equal water flow distribution.

CAUSE – Equipment defect which causes segment to wear unevenly.

SOLUTION – Replace bad bearings, worn arbor shaft, or misaligned spindle.

WOBBLING/WARPED BLADE

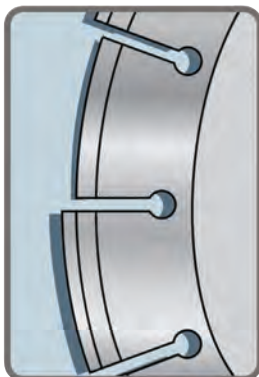

CAUSE – Blade collar mounted improperly. Incorrect collar size. Blade used at improper RPM.

SOLUTION – Check RPM rating for blade and saw. Make sure equipment is operating at rated RPM. Use the correct sized blade collars. Check flanges for smoothness and tightness.

CAUSE – Steel core is not straight as a result of dropping or twisting.

SOLUTION – Discard blade, it is unsafe to use.

If practical, have manufacturer remove segment and rebraze onto new blank.

SEGMENT LOSS

CAUSE – Blade is too hard for material being cut.

SOLUTION – Use blade with proper specification for material being cut.

CAUSE – Steel center is worn due to undercutting.

SOLUTION – Use sufficient water to flush out cut.

SHORT BLADE LIFE

CAUSE – Blade is too soft for material.

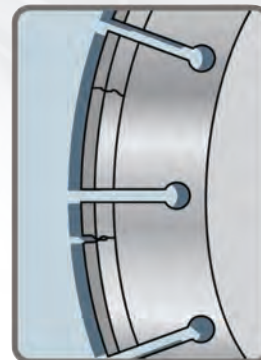

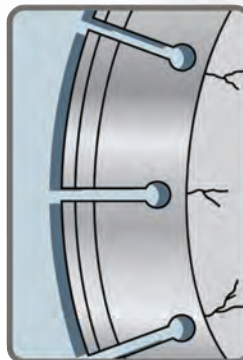

SOLUTION – Choose blade with a more wear resistant bond appropriate for the application. Check water flow and make sure blade is rated for the equipment used.

OVERHEATING

CAUSE – Inadequate coolant.

SOLUTION – Follow guidelines for proper blade operation and cooling procedures. Check water flow. Make sure blade is rated for the equipment used.

Read and understand these warnings and instructions before operating the tool.

CORE OR SEGMENT CRACKS

CAUSE – Blade is too hard for material being cut.

SOLUTION – Use a softer bonded blade.

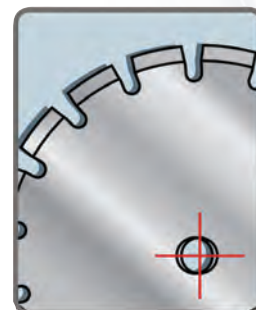

CAUSE – Blade mounted improperly; Saw is in need of repair.

SOLUTION – Check if saw is in good condition and make sure blade is rated for the equipment used. Check all bearings, belts, shaft, and flanges. Check direction of blade travel.

ARBOR HOLE OUT-OF-ROUND

CAUSE – Blade collar not properly tightened, allowing blade to rotate or vibrate on shaft.

SOLUTION – Tighten arbor nut with wrench making sure blade is properly secured.

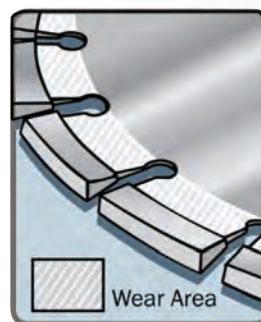

CAUSE – Blade not properly mounted.

SOLUTION – Check to make sure blade is mounted on proper diameter of shaft before tightening arbor nut. Make sure pin hole slides over drive pin.

UNDERCUTTING

CAUSE – Steel core wears faster than diamond segments caused by highly abrasive fines grinding against blade during cutting.

SOLUTION – Use blade with wear retardant cores. Increase water flow to flush out cut.

PLASTIC ANCHORS

USED IN CONCRETE, BLOCK, TILE, BRICK, SHEETROCK, PLASTER, ETC. USE IN HOLLOW MATERIAL USE WITH SHEETMETAL OR WOOD SCREWS.

CONICAL PLASTIC PVC ANCHORS

ITEM #	#	SPECS	PRICE
NY.NFC6810M	1K	3/16" X 3/4" Conical, PVC, Hole Size=3/16", Screw Sizes= #4, #6, #8	\$18.20
